WanAware

360° visibility

Achieve a 360-degree, contextual view of your connected enterprise and enhance reliability and security with WanAware.

Organizations have 50x more connected assets to manage within their enterprise than humans.

This explosion and transformation of assets requires a new approach to managing reliability and security, one that enables scale and agility -- on-premises, in the cloud or at the edge. WanAware bridges the gap between your operations (what users experience) and your operators (monitoring solutions), enabling every business to optimize digital experiences and security simultaneously.

Easily identify risks and correlate issues with underlying architectures to more effectively priortize, investigate and respond to issues affecting the things that matter most to your business.

See your entire connected enterprise with a single tool.

WanAware's agentless scanner connects within minutes with zero impact on asset performance. Build an inventory of every asset connected to your infrastructures and networks and achieve complete visibility into the performance, availability and security of your connected enterprise.

Accelerate digital transformation

Establish better baselines and eliminate blind spots within your connected enterprise and eliminate bottlenecks hindering your transformation initiatives. With WanAware, your operations teams can identify and prioritize risks across your constantly-changing inventory with much less disruption.

Deliver more secure, consistent digital experiences.

Empower operators by giving them real-time visibility into what users experience and actionable insights that help them address issues before they become bigger problems.
